English Proficient

Polish Native

German Intermediate

EXPERIENCE

SCHOOLIFY

CREATING THE FIRST GLOBALIZED ELECTRONIC DIARY FOR SCHOOLS — OPEN | CODE

- Designed from scratch using Figma. Used React, Redux along with Firebase for richer back-end of the app which allowed to create an authentication and a news feed.
- Added styled-components for much better styling performance that increased page load speed.
- Created news feed with some of the latest school's posts, list of grades, upcoming tests, homework, simple reminders and a lesson plan all-in-one to make the use of the application as convenient as possible.
- Used react-router for efficient routing between pages and Heroku for app development.

TELEAN

CREATED A WEBSITE FOR A LOCAL TELEPHONE EXCHANGES COMPANY — OPEN | CODE

- Inspired by several awards winning websites, developed website from scratch.
- Created modern-looking and user-friendly project.
- Used web tools which helped with the website's contrast, SEO and overall performance using Lighthouse.
- Built out a contact section that allowed the clients to report and resolve 80% more issues.

CENTRUM MOTO

REFRESHED A WEBSITE FOR ONE OF THE BEST ATV COMPANIES IN POLAND — OPEN

- Instead of previous solution which was plain HTML, CSS & JavaScript, I chose WordPress with the WooCommerce plugin for the online shop management.
- Developed an "add new product" design rules which made the page looking aesthetic, like proper image dimensions, image backgrounds, offer's descriptions etc.
- Designed a fresh-looking and feature-rich website which helped the company to get 50% more sales and to be more visible on the global market.

DARKNESS

CREATED A DARK LAYOUT OF PAYPAL WEBSITE FOR A BROWSER EXTENSION — CODE

- Forked a repository and got set up the integration between PayPal website and Darkness extension, configured GULP for the SCSS automation which helped with code readability and maintenance.
- Used SCSS variables to configure available built-in to the extension color schemes to make every page look as aesthetic as possible.
- Coded every PayPal site including PayPal's blog to be in "Dark Mode" to reduce eye pain caused by blue light for +100k users that have installed this extension.
